Part A

(Accounting for Partnership Firms and Companies)

1. Individually: Partners

Collectively: Firm

2. Net Amount of Loss transferred to:

A's Capital Account: Rs. 87,000

C's Capital Account: Rs. 29,000

3. Ratio of H, P and S is 4 : 3 : 3

H's Gain = $\frac{3}{10} \times \frac{20}{100} = \frac{3}{50}$

H's new share = H's old share + H's Gain

= $\frac{4}{10} + \frac{3}{50} = \frac{23}{50}$

S's Gain = $\frac{3}{10} \times \frac{80}{100} = \frac{12}{50}$

S's new share = S's old share + S's Gain

= $\frac{3}{10} + \frac{12}{50} = \frac{27}{50}$

New Profit sharing Ratio of H and S is 23 : 27

4. Solution: In case of dissolution of partnership, the firm continue to do business but with a changed agreement. In case of dissolution of partnership firm, the firm ceases to exist, the assets of the firm are realised and its liabilities are discharged.

5. Solution: Irredeemable debentures are called perpetual debentures because these are not repayable during the life span of the company.

6. Solution: Shares can not be converted into debentures or any other security whereas the debentures can be converted into shares if the terms so provide.

Working Notes:

(i) Since the Shares are allotted in the proportion of 5 : 4, therefore for 900 applied shares, shares allotted are $4/5 \times 900 = 720$ Shares.

(ii) Application Money Received on 900 Shares = $900 \times 16 = 14,400$

Amount adjusted on Application = $720 \times 16 = 11,520$

Amount to be adjusted on Allotment = 2,880

(iii) Allotment Money due on 720 Shares = $720 \times 7 = 5,040$

Less: Already received = 2,880

Allotment Money not received = 2,160

(iv) Calls in Arrears:

Allotment Money = 2,160 + First & Final Call Money = 1,440 = 3,600

(ii)	Calls in Advance	Current Liabilities	Other Current Liabilities
(iii)	Stores & Spares	Current Assets	Inventory

(b) Any two of the following values: Transparency, Honesty, Abiding the Law. (Or any other relevant value)

21. Interest Coverage Ratio= Net Profit before Interest and Tax/ Interest on Long Term

Debts

Net Profit after Tax = Rs. 6,00,000, Tax Rate = 40 %

Net Profit before tax = $100 / (100 - \text{Tax}) \times \text{Net Profit after tax}$

= $100 / 60 \times 6,00,000 = 10,00,000$

Interest Coverage Ratio= Net Profit before Interest and Tax / Interest on Long Term Debts

= $10,00,000 / 4,80,000 = 2.08 \text{ Times}$

Significance of Interest Coverage Ratio: It reveals the number of times Interest on Long Term Debts is covered by the profits available. A higher ratio ensures safety of interest on Long Term Debts.

The Interest coverage ratio will improve if the company decides to redeem Rs. 5,00,000 debentures assuming that Net Profit after interest and the tax rate will be same. 1

Computerized Accounting

18. Sol: (c)

19. Sol: (b)

20. Sol: The computerized accounting is one the database-oriented applications wherein the transaction data is stored in well-organized database. The user operates on such database using the required interface and also takes the required reports by suitable transformations of stored data into information. Therefore, the fundamentals of computerized accounting include all the basic requirements of any database-oriented application in computers.

Accounting framework.

It is the application environment of the computerized accounting. A healthy accounting framework in terms of accounting principles, coding and grouping structure is a pre-condition

for any computerized accounting system.

Operating procedure.

A well-conceived and designed operating procedure blended with suitable operating environment of the enterprise is necessary to work with the computerized accounting system.

21. In computerized accounting system, every day business transactions are recorded with the help of computer software. Logical scheme is applied for codification of account and transaction. Every account and transaction is assigned a unique code. The grouping of accounts is done from the first stage.

[Briefly explaining what is account groups and hierarchy of ledger.]

The hierarchy of ledger accounts is maintained and the data is transferred into Ledger accounts automatically by the computer. In order to produce ledger accounts the stored transaction data is processed to appear as classified so that same is presented in the form of report. The preparation of financial statements is independent of producing the trial balance.

22. Internal manipulation of accounting records is much easier in computerized accounting due to the following:

- i. Defective logical sequence at the programming stage
- ii. Prone to hacking

23. Every accounting software ensures data security, safety and confidentiality. Therefore every, software should provide for the following:

- **Password Security:** Password is a mechanism, which enables a user to access a system including data. The system facilitates defining the user rights according to organization policy. Consequently, a person in an organization may be given access to a particular set of a data while he may be denied access to another set of data.
- **Data Audit:** This feature enables one to know as to who and what changes have been made in the original data thereby helping and fixing the responsibility of the person who has manipulated the data and also ensures data integrity. Basically, this feature is similar to Audit Trial.
- **Data Vault:** Software provides additional security through data encryption.
